HIGH VOLUME SINGLE PIECE PRINTING

Inserting Transfer Paper

Sample Production

Single Piece Production

Roll to Roll Production

THE GTC SP FLOWLINE OFFERS:

- ▶ single piece and roll-to-roll transfer printing;
- ▶ long infeed table;
- ▶ movable separation bar;
- ▶ low tension textile winder (roll-to-roll application);
- ▶ safety chucks and airshafts;
- ▶ fume extractor;
- ▶ reliability and consistency by the use of multiple heating elements over the full width;
- ▶ modern machine with touchscreen, operation, pneumatic tension settings, incorporated textile feed through.

Larger drum, more speed, highest quality

ANY JOB, ANY MATERIAL

The GTC-SP Flowline series have been designed for efficient production of single piece transfer printing, but is also capable of cut sheet repeat jobs or roll-to-roll transfer printing.

All kind of materials like woven, stretch or knits can be printed. The high volume flowline execution is available in 760 mm/30" and 1070 mm/42" drum diameter.

BASIC TECHNICAL FEATURES

Roller width	2000 mm 78.7"
Working width	1800 mm 70.8"
Heating drum Ø	760 for GTC 131 or 1070 mm for GTC 141 30" for GTC 131 or 42" for GTC 141
Table length	2,6 m extendable with sections of 1 m 102" extendable with sections of 40"

SCHEMATIC VIEW OF THE GTC-SP FLOWLINE
